

# Deep Eigen

## Shani Dev, Pulkit Upadhyay, Aakriti Jha

### Swaayatt Robots Website

#### Homepage:

- **Landing Page:**
  - Implement a strip of text banner below video featuring the main heading:  
**Autonomous Driving**  
**Adversarial and Unstructured Environments via Reinforcement Learning**
  - Ensure full-screen backgrounds with no empty spaces.
- **Our Mission:**
  - Add hover effects to each section, displaying technology highlights for industrial applications. Use this video-<https://youtu.be/9FnVy6dsxbs>
  - (ask Sir for high resolution)
- **Research & Techstack:**
  - Modify the design, including font changes and alignment adjustments.
- **Blogs:**
  - Connect the blog section to the backend using Django.
- **Media:**
  - Remove swipe buttons and implement automatic scrolling for media content.
- **Prior Funding and Ecosystem Support:**
  - Update and align this section properly.
- **Footer:**
  - Adjust the logo and color scheme.

#### Research Section:

- Modify the headline and realign the video layout to reduce empty spaces.
- Combine all demos on a single page, separating "on-road" and "off-road" demos and adding descriptions for each.

#### Career Section:

- Reorganize and restructure the content to ensure better design utilization
